

BROWER MINERAL FEEDER

Animals Are Easily Attracted To Our Feeders - Cows, Bulls, Calves, Small Ruminants and Yes, Even Horses. No Training is Necessary.

LMF10

Body molded from high density polyethylene. Hindered amine light stabilizer, the most effective ultraviolet inhibitor, is added to the resin when the body is molded.

Holds 200 lbs. (90.9 kg) of loose supplement level-full. Also holds three 50 lb. (22.7 kg) salt or mineral blocks. Can accommodate larger blocks up to 12 inches (30.5 cm) square.

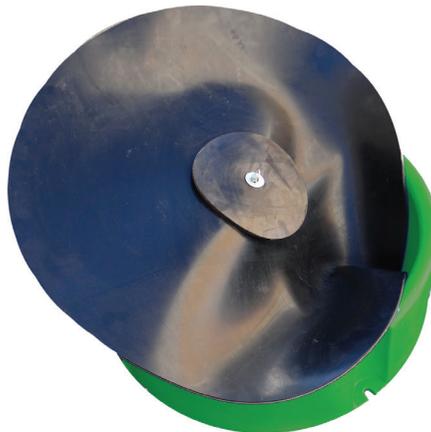

Four notched flanges for easy anchoring.

Molding process engineered to permit extra material to flow into center post for extra strength. Post has a 6 inch (15.2 cm) diameter base and is further supported by three partitions.

Solid bottom.
The most rugged design you can buy.

Our 3/8 inch thick flap will never do this.

Our core around the center hole is plied reinforced.

**Unquestionably,
The Best Flap
Available!**

LMF20... Significant Shipping and Cost Advantage

Link pin allows flap to ride up when lifted by animals. This permits give and extends the life of the flap and feeder.

Heavy duty 36 inch (91.4 cm) diameter flap protected by 11 inch (27.9 cm) rubber disk. At virtually every farm show we attend, producers want to buy our flap to replace flaps on competing feeders.

Body high density polyethylene. Hindered amine light stabilizer, the most effective ultraviolet inhibitor.

The feeder has two compartments. The feeder will hold two standard mineral or salt blocks or a total of about 150 lbs. (68.2 kg) of loose mineral.

Model LMF20

Is shippable via ground package service with no oversize charges. LMF20 nests 20 feeders per pallet. The stack is 90" (228.6 cm) tall or 95" (241.3 cm) tall including the pallet.

INSECT-A-SOCK

ALLOWS SELF TREATMENT • DURABLE • EFFECTIVE

- ✓ Our two inch diameter sock attaches to the outside of our flap. The sock is filled with acrylic fibers. Insecticide solution clings to the surface of the fibers. As one of your animals lifts the flap to eat mineral, the solution wicks away from the fibers to treat the face, head and shoulders.
- ✓ The proper use of our Insect-A-Sock helps to control face flies, lice, ticks and mosquitoes. Face flies are common transmitters of bacteria which cause pink eye.
- ✓ Use an EPA approved insecticide and follow the instructions. Mix insecticide with a carrier not known to cause eye or skin irritation. The carrier should be pH neutral and cost effective. Re-charge the sock with about one gallon of mix every 7 to 10 days during fly season.

Insect-A-Sock

Is available with LMF10 only.

MINERAL FEEDER SPECIFICATIONS

Model No.	Approximate Capacity		Overall Diameter	Hopper Diameter	Eating Height	Overall Height	Shipping Weight
	Animals	Mineral/Feed
