

## BROWER'S TOP HATCH INCUBATOR

*Affordable Technology • Multiple Applications*

**ONE UNIT DOES IT ALL**

Applicable for most species.

When it comes to table top incubating, we have the **World's best...**

- \* Temperature uniformity
- \* Hygiene
- \* Turning mechanism
- \* Standard features (fan, clear top, headroom)...

And brought to you at the **World's best price.**

Precision designed for technical applications and for the serious hobbyist.

A fine tool for providing affordable protein.

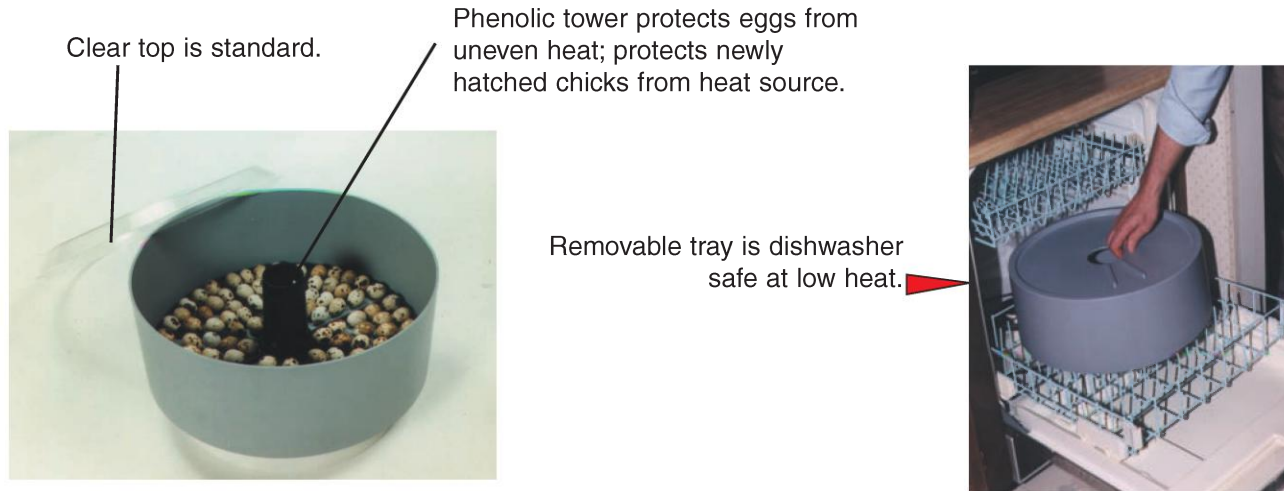

Observation friendly for learning situations.

With Brower Since 1922

## A COMPLETE DESIGN WITH DURABILITY AND LOTS OF VALUE

### Tech Temp Control gives nonfluctuating heat.

## 13 REASONS WHY YOU'LL NEVER BUY ANOTHER STYROFOAM INCUBATOR

1. **HYGIENE:** Our tray is removable and dishwasher safe at low heat. Styrofoam pores hide pathogens and the surface cannot be scrubbed.
2. **MORE EVEN HEAT:** Our Tech-Temp Control adjusts for temperature fluctuations caused by any changes in the environment. Tech-Temp Control adjusts to temperature changes more quickly than a water switch. Fewer hot spots and no forced blasts of air each time the element heats.
3. **CONTINUAL AIR EXCHANGE:** Standard equipment fan gently mixes heated air which billows throughout tray.
4. **PROTECTED ROLLING OF THE EGGS:** Accomplished with our standard automatic turner and universal turning rack.
5. **TURNING RACK:** Does not need to be removed for hatching.
6. **UNIVERSAL EGG RACK:** No need to buy separate cups for different species.
7. **TOTAL VISIBILITY TO EGGS:** No more small windows covered with condensation. No extra investment for a clear top.
8. **SELF-DIAGNOSTIC HEAT SOURCE:** You always know you've got heat - just look at the light.
9. **READILY AVAILABLE HEAT SOURCE:** Replacement heat is as far away as your nearest bulb retailer (60 watts, Candelabra Base).
10. **NEWLY HATCHED CHICKS SAFE FROM HEAT:** The heating elements found in styrofoam incubators can burn the beaks of curious chicks.
11. **A COMPLETE DESIGN:** No after-thought add-ons. You don't need to cut holes in styrofoam to add our automatic turner cordset.
12. **NO EXTENSION RING:** Not needed for larger eggs such as goose and turkey because 7 inches (17.8 cm) of clearance is standard.
13. **DURABILITY AND VALUE:** You don't get a 2-year warranty on styrofoam. Our incubator is designed for years of service yet our unit is comparably priced to disposable competitive incubators.

### INCUBATOR SPECIFICATIONS

Model no.	Description	Egg Capacity (approximate)					Overall Diameter Inches (cm)	Shipping Weight Lbs (kg)
		Chicken	Quail	Pheasant	Turkey	Goose
